DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 15-21, drawn to an oxidized carbohydrate.

Group II, claims 22-25, drawn to process for preparing oxidized carbohydrate.

Group III, claim 26, drawn to process for preparing an oxidized, amino-substituted carbohydrate.

Group IV, claims 27-29, drawn to oxidized, amino-substituted carbohydrate.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I-III have the common feature of an oxidized carbohydrate containing aldehyde (carbonyl) groups and carboxylic acid (carboxyl) groups, the ratio of the two groups being between 25/75 and 80/20. However, oxidized carbohydrates having the recited ratio of these groups are known in the art. See Jeanes et al (JOC, 1955 - at page 1566,

Art Unit: 1623

midpage) and Le Roy et al (US 3,553,193 - see Tables I and II). Therefore there is no novel feature, supplied by Applicant, that unifies the the separate inventions.

As discussed above, Groups I-III are related by the common (non-novel) oxidized carbohydrate product. Group IV, on the other hand, is drawn to another product, oxidized amino-substituted carbohydrate, which is patentably distinct from the product common to Groups I-III. Group IV is related only to Group III. The two inventions are related as product and method of making, respectively.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
